Getting Started

Crafting with pom-poms is easy and lots of fun. Most of the projects in the LITTLE CRITTERS section are very simple and use the least amount of materials. I recommend that you start with this section and after you get the hang of it, go on to more complex designs. They are all pretty easy and you don’t need to be a craft ‘pro’ to be successful.

MATERIALS
Each project page contains a complete list of materials needed to complete the design. Feel free to substitute colors and sizes to fit your taste. Improvise whenever you feel creative, or follow the instructions and most importantly, have fun.

ABOUT POM-POMS
They come in many sizes, from 5mm up to 2". They are fuzzy, furry, soft and very easy to work with. Pom-poms are held together at the center and can be trimmed extensively before falling apart. Don’t worry about making mistakes on pom-poms. If you ‘ruin’ one, save it and use it for another project or put eyes and feet on it and create a new species of critter.

GREAT FOR GROUPS
These projects are great for groups. Pom-poms come in packages of assorted colors or one color and a few of the same size in a package. Chenille can be bought in packages of assorted colors or individually. Wood shapes come in packages with a big assortment of sizes and shapes. Wiggle eyes usually come one size to a package and the smaller the size, the more you get.

TOOLS
- wire cutters
  Good for cutting chenille and craft sticks. Be careful when cutting because sometimes small pieces fly out of control.
- scissors
- craft glue or glue gun
  I recommend a low temp glue gun and supervision of young crafters by a parent or another responsible adult.
- tracing paper
  All the patterns for felt pieces are actual sizes or close enough to fit. Trace them, cut out the tracing and place on the felt. Draw around the pattern with a soft pencil and cut out. On dark fabric you can pin the tracing paper to the felt and cut around the pattern, cutting through both the tracing paper and the felt at the same time. Don’t try to be too perfect. Much of the charm of these critters comes from imperfections.
- tweezers
  Some of the pieces are pretty small and hard to hold for gluing. I used jewelers tweezers. They are extremely helpful when using a glue gun, no burnt fingers.
